

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

VISION

The recent history of mankind, which could cover the last 5,000 years according to the information officially transmitted to us, is based on the structuring of society based on five pillars:

1. The separation of human beings into differentiated groups occupying delimited territories of which they are considered "owners" or "occupants by right". The struggle for territory and resources between different groups thus becomes a constant. The vision of the human being as an entity, which keeps us as equals and cooperative, is reduced to a concept of disaggregation by ethnic, tribal or other groups. Cooperation as a basis for dealing with the different situations that arise in human evolution is replaced by confrontation.
2. The existence of a civil power that assumes the command of a more or less extensive community. At its apex it is structured as a figure that orders and commands. In Western culture, denominations such as king, emperor, president or other equivalents are applied to this figure. This "supreme" figure in turn establishes other intermediate figures of power that, in the historical and geographical evolution, have been changing their denomination and powers, but maintain common concepts: they consider themselves superior to the rest and control and oppress in different ways those they consider "inferior" or "administered" in more modern terminology.

Lower level concepts such as the family or the family group or those with historical ties of consanguinity constitute the most elementary community level above the individual, which contribute to eliminate the Human Being as a foundation in everyday life.

The Human Being has definitively ceased to exist as the axis of existence and action.

3. The need for an army or element of force to keep the populations they dominate subjected to civilian power. The army, in turn, makes it possible to increase the territories occupied by each community or appropriate the goods or people of other communities. Force has finally replaced brotherhood among Human Beings.
4. In order to structure all the levels of the different societies in a less aggressive way and to capture the minds of all the social levels, religions and their corresponding gods appear. These replace, with majority character, the spirituality that is an essential part of the Human Being. Gods and sacred figures are created to explain and give "soft" mental support to the social structures that are being created or to their evolution. The heads of the different religions or "sacred" beliefs become part of the human power structure. Religions can be used, and are used, both as an element of social cohesion and as an element of social or tribal confrontation.

Authentic spirituality continues to manifest itself in all its grandeur, restricted to limited individuals or groups throughout the planet.

5. In modern societies, the mass media, mostly controlled by the multilevel power centers indicated in the previous points, become means of mental control of the populations. They promote collective hypnosis and support the existence and action of civil power, armies and religions. They also maintain tension and/or confrontation with other social groups in order to distract the attention of the masses from what is really important. The Human Being is treated as a programmable and manageable object, developing very sophisticated techniques to achieve this.

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs 1

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

None of the above really eliminates the Human Being as the basis nor spirituality as the connection of the Human Being with its true essence.

The vision of the F.A.U is to support social evolution, returning to the consideration of the Human Being as the basis in all its dimensions. To this end, it considers all Human Beings as members of a large family who must be supported to grow and develop each one in their particular path for social, labor, economic and intellectual life. All this, without imposing any particular vision and supporting the way each one considers appropriate in issues such as creation and support of personal or family businesses; education and training that is not biased and that helps to develop personal capabilities to the maximum; support for the construction and acquisition of housing in fair conditions; ensuring access to basic goods and services: healthy food, clean water, energy supply, communication systems, travel and others.

MISSION

We are a group of Sovereign Human Beings who, united, want and seek ways to collaborate with all living beings on the planet and with the planet itself.

The Mission of F.A.U. is to propose and support ways for the construction and creation of a free planet, supporting the return to the consideration of the Human Being in its integrity and its interaction with the other living beings and with natural resources of the Planet. This one is also regarded as a living being that we must also support to maintain its balance, which is the basis of our own.

F.A.U. assists us to find the way and the reconnection with our true essence and our rights according to the Universal Laws. We propose ways to access all the abundance that the planet offers and support those who act in the same direction.

The time has come when a growing percentage of humanity begun to remember our true origin and source of life. Through this beautiful project called F.A.U. and all its members are dedicated to the service of Humanity. We want to participate by creating a wide range of new forms, new paradigms, new ideas and ways of acting where every Human Being has the right to an abundant and dignified life, to have the freedom to advance, grow and participate. All together in the cosmic union of Light, regardless of religions and beliefs. For this we will put in place everything within our reach, without barriers or borders, with imagination, to collaborate with the entire human family in carrying out the points mentioned here, one by one, from Unconditional Love. We will assist without doubts, supporting and empowering the ideas and capacities of each person and group of the great family, thinking small to create big.

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs 2

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

OBJECTIVE

Our main objective is the **strengthening and development of the Human Being and the rebirth of the family unit, understood in its broadest sense**, without money being the problem for this transition to the new world in abundance and love.

The next and no less important objective is the **reconstruction and restoration of the Flora, Fauna and natural resources** of the entire planet.

As a consequence, we will be able to **enjoy Peace, Abundance and Universal Love among all Living Beings and the planet that gives us life**, which by natural right corresponds to us in respect and unity.

Below are the different actions and programs that make up F.A.U.

1.- PROGRAM OF ASSISTANCE TO THE INDIVIDUAL (P.A.I.)

1.1 TO WHOM IT IS ADDRESSED.

Aimed at people in a situation of social exclusion. Through organized and trained surveyors, these people will be contacted individually. The action is structured in several phases.

- a) In the first meeting with these people in the street or wherever they are, the interviewers will make themselves known. With an empathetic and courteous attitude, they will take an interest in the person's overall condition. By means of a questionnaire, they will open a file with the person's data, personal situation and the reasons that led him to find himself in this situation. The interviewers will answer the questions and doubts raised and will evaluate the different options for action given the characteristics of the person concerned. As a farewell, the interviewers will propose the possibility of meeting themselves again in the same place or wherever the interviewee wishes. The initial objective will be to evaluate the possibility of temporarily helping the person to get out of such situation of helplessness and to analyze alternatives to redirect him to become a self-sufficient person, defining the the support required for this purpose.

At the outset, the person will be offered the possibility of being picked up in a temporary residence or facility.

- b) After this first conversation, the possibilities of temporary support and personal redirecting are analyzed, avoiding that these actions encourage inactivity and voluntary dependence of the person, entering into a program to improve self-esteem and activities that can be developed for the benefit of others. A Personal Benefit Plan is defined for each person and, in a second formal interview, a Common Action Plan and an Individual Follow-up Plan are proposed to the person to be agreed upon.

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs 3

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

- c) In a third phase, a follow-up meeting is held, preferably bringing together several people from the same social group, to encourage mutual support and integrate them into society.

With respect to people with sociopathic, personality and/or behavioral disorders who are on the street, they will be attended by professionals.

It is really here where we must make the best efforts. We must locate them as soon as possible.

For this purpose, it has been decided to take advantage of the institutional support, aid and information structure already existing in the geographical area. The information they recorded and filed might be very useful to go directly to the people in social exclusion. In order to achieve this, it would be advisable to meet with institutional support people who, at one time, were civil servants in public administrations and ask them to give us the data, and at the same time we will ask them to allow us to use part of the public facilities.

Once the information is collected, we will distribute and communicate with the socially excluded people without delay, filling out the necessary documentation to provide them housing and delivery of the card of the Minimum Universal Income per individual, solving all their basic needs.

On the other hand, and simultaneously to the previous process of location of each individual and contact with them, we will be locating land for possible acquisition, construction or remodeling of existing homes, which should be perfectly equipped for immediate entry and inhabitation.

Within this program it is imperative and of great importance to adopt the project HAPPY CHILDHOOD in support of the development of the individual according to their needs in all their stages, creating children's spaces that will operate 365 days a year, 24 hours a day. It will serve to produce happiness and give support to families, offering these spaces where they can develop different activities, therefore, we will all be happy.

It is equally imperative the creation and development of the CONSCIOUS EDUCATION project. Children, when we are born, often retain during the first years of life on this planet the memory of what we lived in our state prior to conception and the capabilities we had available. The new schools and educational systems for parents, babies, children and young people, will develop and apply systems that help to maintain and enhance that previous memory and support in training educators, parents and children in the awareness of the Self, the development of innate capacities and the orientation towards love, compassion, integrity, impeccability and creativity of our life as the basis of the Human Being and human relationships.

F.A.U. has a direct relationship with the Quantum Healing Centers to support the different Holistic activities that will be developed within these Centers.

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs 4

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

1.2 PLAN OF ACTION.

- a) Contract staff for search and attention to indigents, people in repatriation situation and/or people of low resources and homeless. Initiate conversation in a pleasant manner with empathy and build trust to detect their level of awareness and know their desires to improve their quality of life to meet their basic needs.

Give them full explanation about the Gesara Law and the Universal Minimum Income everybody will receive and about what F.A.U. can offer them for a total change in their life, for them to be able to enjoy and be happy without suffering needs anymore.

Promote with your intervention the autonomy within the coexistence and at the same time create awareness guiding him towards his self-sustainable labor independence and support him so that he feels fulfilled.

- b) Talk with those who were civil servants in City Halls and Social Centers, taking advantage of the already existing geographical structures to obtain the information of all those people who have requested assistance and to take care of them.
- c) Locate places and obtain the right to use land, buildings or warehouses suitable for the objective being sought. include the possibility, if necessary, of leasing or purchasing them to create the necessary structure giving the adequate support to the Human Beings or Animals program Beneficiaries. Handle it properly while the plan is being developed so that they can have a self-sufficient, full and balanced life while taking control of it.

1.3 TOOLS TO IMPLEMENT THE ACTION PLAN.

- a) Creation, as soon as possible, of a short Video-Clip that transmits the Essence of the FAU Project. It must be imbued with the enormous energy and deep Love that nurtures the essence of the FAU Project and transmit the Peace, Joy and Happiness that FAU is going to contribute to expand in the human society and in all Living Beings in general.

This video-clip would be the introduction card of FAU in the areas where it is presented.

- b) Under the same approach of the video, hire as many Assistants to the Direction as necessary according to the area to cover, mentally and spiritually aligned with the task at hand. They will be giving support and information from F.A.U to carry out the work of assistance to the Human Beings welcomed to the program or managing it.
- c) Select and hire Real Estate Agents, under the contractual conditions previously defined by experts and approved nationwide, so that they are homogeneous and manageable.

The process would have several steps:

1. Locate potential Realtors.
2. Analyze them and propose suitable ones to FAU managers.

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs 5

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

3. Negotiate with them the conditions for their hiring and the objectives of their search and sign the proper collaboration contracts when accepted.
4. Contrast with the Realtors their findings and proposals for buildings, warehouses, land or others. Compare them and then obtain the right to use those that are considered suitable for the objective being sought. Possibilities include assignments, donations, leases, acquisitions or others legally established. Evaluate, before the final decision, the modifications and arrangements needed to effectively fulfill its function.
5. Once the real estate has been contracted, adapt the facilities and provide them with the necessary equipment and material. It is recommended to hire suitable professionals for the different tasks, including decoration and distribution of spaces. Once completed, make them available to the Human or Animal beings under the program, previously agreeing with them contractually the conditions and duration of the support they need. Then provide them with whatever is necessary until they reach the agreed level of autonomy and control of their own lives.

2.- SMALL BUSINESS ASSISTANCE PROGRAM (P.A.E.)

2.1 TO WHOM IT IS ADDRESSED.

This program assists small and medium enterprises and professionals already established as self-employed, artisans or others whose illusion and dreams is to have their own business for their own benefit and that of the community in which they are inserted.

2.2 ACTION PLAN.

- a) The first step would be to identify people, existing businesses, or target areas of activity in the area covered by each FAU. On this basis, those in charge of each FAU would study the advisability of supporting which groups, activities or individuals according to local conditions and the feasibility of doing so.

If any were not considered viable for objective reasons, the possibility of proposing, training and supporting the transformation to other types of activity that are more viable and compatible with sustainable development, protection of living beings and the planet, and the possibilities of the site would be studied.

- b) After reaching a decision, it is proposed to the corresponding persons or groups the possibility of joining the Program through Agreements **for a determined period of time** that could include, if it is the case, doubling their average annual income or benefits in exchange for adapting them to the necessary conditions of sustainability, ecology and respect for the living beings of the planet, including the possible use of new quantum technologies or others that could be applicable.

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs 6

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

Once the conditions of the previous point have been accepted, FAU proposes to the employees of the companies or groups of workers or artisans to be financed directly by the Program, also increasing their previous income.

In this way, companies, the self-employed, workers and the Community as a whole benefit and consolidate a level of self-sufficiency.

2.3 EXAMPLE OF APPLICATION.

About the process of this assistance to companies and workers, let's take as an example a Bakery that reaches an Agreement with the director of F.A.U. in contracting the company for a determined time of seven years, an average profit is calculated during the lapse of the last five years from where the average-profit per minute is obtained for 24 hours per day of every day of the year, will be payable in cents per minute.

Average profit in a year = 70.000€.

Number of minutes/year, rounded to 365 exact days per year = 525,600 minutes

Doubled profit = 140.000€.

Doubled annual profit / Minutes per year = 27 cents/minute.

This average-profit 27 cents will be payable per minute. Thus, the FAU program would pay the entrepreneur the calculated average profit multiplied by 2.

The following table summarizes the above calculations for the first year of the FAU agreement. During the next few years, the entrepreneur will receive the calculated amount in the 4th quarter without increases, until the contract is fulfilled.

Contribution per employee per year					
	ctms/minute	ctms/day	D/quarter	ctms/quarter	€/quarter
1st quarter	1	1.440	90	129.600	1.296,00 €
2nd quarter	2	2.880	91	262.080	2.620,80 €
3rd quarter	3	4.320	92	397.440	3.974,40 €
4th quarter	4	5.760	92	529.920	5.299,20 €
			Total	1.319.040	13.190,40 €

At the same time, through this program, **employees are hired for the same determined time that was done with the Company** and thus they receive their salary plus the increase. For

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs 7

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

the employee for each quarter, during the first year, there is a profit increase of one cent per minute, in total he would receive an increase of 43,200 cents per 30 days which is equal to 432.00 euros, in his first quarter, plus salary and with a quarterly increase of 1 cent during the first year, maintaining the value of the last download during the rest of the contract.

2.4 ACTION PLAN.

- a) Promotion and outreach for an early connection with small and medium-sized companies and/or freelancers that collaborate for the benefit of the community to hire them for a determined time and double their earnings, and thus be able to offer a better service to the community.

It is broken down into the following points.

1. Drawing up templates of Agreements Contracts for a determined period of time for the different Companies that accept to double their average annual earnings.
2. Drawing up templates of Agreement Contracts for the determined time agreed with the Company and the latter with its employees who will receive their monthly salary plus the increase.

3.- PROGRAM OF ASSISTANCE TO COMMUNITY SERVICE AGENCIES AND CORPS.

3.1 TO WHOM IT IS ADDRESSED.

FAU will evaluate, taking into account objective criteria and compared with other equivalent bodies in the country and in the nearest higher level, the level of operation and efficiency of the official administrative and/or operational agencies and corps that support the local community.

Likewise, F.A.U. will continue to contribute to maintain all the supplies of basic services such as water, electricity and others when needed.

Such would be, for example, Guardia Civil, National Police, local Police, Civil Protection, local health services, ambulances, schools and education for parents, babies, children and youth, etc.

Additionally, it would contribute to provide them with the elements and tools for an effective and adequate attention to the Community to assist them. FAU will provide everything may be needed to avoid negative situations caused by lack of equipment or material of any kind. For example, citing the Fire Department, it may be necessary to improve or expand the existing

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs 8

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

vehicles, technical equipment or training for personnel, communications systems equipment, etc. to ensure that they will be able to respond effectively to emergencies that require it.

It may also be necessary to improve the training and personal attitudes of some of the personnel of the former operational and administrative services of public administrations at any level.

In summary, the full participation and collaboration of the employees of the former public administration system will be necessary, taking advantage of the existing geographical structure, in order to effect the transition to the new system in the shortest possible time, compensating for the existing imbalances.

3.2 PLAN OF ACTION.

- a) Adequately evaluate the people necessary and available to cover the real existing needs, as well as the resources of all kinds that may be necessary. For these tasks it will be necessary to have a sufficient number of qualified and experienced professionals to ensure the reality and feasibility of the proposals.
- b) Carry out an urgent adaptation plan, with the support of qualified and expert personnel of the system. Start its implementation in the shortest possible time.
- c) Develop a new common management system for all and its corresponding technological support.

4.- IMPULSE YOUR IDEAS PROGRAM (P.I.T.I.).

4.1 TO WHOM IT IS ADDRESSED.

This program is created so that people can make all their dreams come true through the concession of one or several loans, which are granted with unconditional love.

They will be able to access an amount of money, upon request based on their real needs. FAU encourages everyone to fulfill the most ambitious dreams that you never even thought could be fulfilled like trips, vehicles, projects, any wish you want to make come true. FAU will provide you with the loans you require, interest free, with agreed repayments so you can make them according to your possibilities.

With these loans we also encourage the creation of businesses and promote employment.

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs 9

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

4.2 ACTION PLAN.

- a) Establish, with general character, the criteria and procedures for the concession of these loans, also making the applicant responsible for the good or bad use of that money transferred from the F.A.U.
- b) Define the administrative and experts processes to assess the opportunity and priority of granting the requested loans and the procedures for their repayment, according to their contribution to the benefit of the Community as a whole or to the creation of wealth and common welfare or for the planet and the repayment capacity of the applicant.

5.- RECOVERY AND RENAISSANCE PROGRAM (P.R.R.).

5.1 TO WHOM IT IS ADDRESSED.

Environmental restoration is the process consisting of reducing, mitigating and even reversing in some cases, the damages or deficiencies produced to the physical and energetic environment in order to return as far as possible to the structure, functions, diversity and dynamics of the original ecosystem.

To this end, the original conditions must be restored and the negative environmental impacts caused by previous activities of any kind carried out in the area that have had a negative impact on the local or general climatology, the available natural resources, their condition or the viability of the original native animal or plant life must be corrected.

5.2 ACTION PLAN.

Depending on the condition of the area and natural resources and the type of use proposed for it, different types of actions or action plans will be proposed which could include:

- a) Recovery and cleaning of natural water flows in the mountains and forests. In coherence with the provisions of the action plan, carry out specific interventions in the population centers and their area, for their optimal integration and improvement of the environment, according to the environmental characteristics compatible with the area, its geography and meteorology.
- b) Environmental restoration, rehabilitation of degraded spaces for the recovery of habitats and the improvement of the landscape and our relationship with the flora and fauna.
- c) Expansion of green areas within the urban and peri-urban territorial scope: Interventions that improve the aesthetics of urban parks, public parks, trees, irrigation and drainage systems, perimeter spaces, squares, traffic circles, traffic islands and medians.
- d) Execution of a set of specific complementary facilities to the road network such as viewpoints, parking lots, etc., in the most convenient places of each itinerary.

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs 10

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

- e) Creation of pedestrian corridors/cycle paths on the edges of roads where there is a significant flow of pedestrians, with different characteristics depending on the purpose of protection of each space.
- f) The creation of Flora and Fauna Protection Centers, respecting the ecosystem and being aware that we are part of the same family and the same Earth.
- g) Encourage the re-education in the Agriculture sector for its development at an individual level and at a commercial level, promoting the consumption of natural ecologic products, thus recovering the conscience about its nutritional power.
- h) Encourage the creation and use of the Composters to benefit the crops, strengthening the soil with the contribution of the worms, heap composting ground and leakage obtained from the heap as a perfect fertilizer.

Encourage and promote the cultivation of hemp and other natural elements as advantageous natural alternatives for ecology, health, substitution of industrial products derived from petroleum, proteins or animal fats or chemical processes. For example, textile manufacturing, ropes, ecological construction, bioplastics, paper, fabrics, soap, food, oil, food supplements and cosmetics.

- i) Recover natural water flows in forests and woodlands.
- j) Increase the area of green and leisure spaces within the area of action, so that all human beings and their pets can enjoy nature, sharing and learning from it.
- k) Create centers for the recovery and care of animals, either abandoned, native or captive that may be injured for any reason. Help them to recover their health and reintroduce them into their natural habitat.

Create work teams to place these animals in open or controlled natural environments with a previous review of their behavior and state of health for their better geographic reinsertion of origin.

- l) Promote agriculture at an individual and/or collective level for their own benefit and/or for the benefit of local shops and stores.

Many of these works, their previous studies, feasibility plans, impact and execution studies will be carried out in collaboration with Universities, Research Centers and other entities dedicated to conservation. Therefore, the Flora and Fauna Protection Centers will become true centers for the conservation of the natural environment to be recovered.

5.3 TOOLS TO IMPLEMENT THE ACTION PLAN.

With these tools F.A.U. contributes to the recovery of Flora, Fauna and our Beloved Earth.

- a) Promote the constitution of local or regional companies and cooperatives, consortiums or other instruments for the realization of studies, projects and continuous monitoring of their environmental impact and evolution.

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs 11

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

- b) Restore the local native fauna, when the flora allows it and to promote its evolution avoiding negative interactions and interferences with human beings.
- c) Actively promote forums, means and supports for training, information, dissemination and experimentation on environmental issues. At the same time, promote constructive interaction between all levels involved: spiritual, material, evolutionary, etc. that encourage participation and individual and collective practice and cooperation between different FAU at territorial, national and international levels.
- d) Promote the constitution of local or regional companies, cooperatives, consortiums or other instruments or contract forest clearing companies. Locate the natural water flows and that they continue to be active.

6.- ART, CULTURE, CREATION AND SPORT PROGRAM (P.A.C.C.D.).

Through this program F.A.U. can benefit the individual with basically creative activities and great enhancers of the inner vibration, collaboration and spiritual orientation of the Human Being as Art, Culture and Creation, as well as developers of physical health such as healthy eating and Sports.

Through F.A.U., we seek to promote, encourage and support the integral development of the Human Being, providing the necessary resources so that each population can develop in a comfortable, complete and abundant way the artistic and cultural activities, the infinite development of the creation of these different activities and having the use of technology at their disposal.

This program is open to cover all the needs not explicit in this project demanded by citizens, creators and artists.

6.1 TO WHOM IT IS ADDRESSED.

This program is aimed at all Human Beings, regardless of their age, condition or capabilities. For everyone there is a space, individual or community, in which we can teach, share, learn or develop our multiple capacities and variants. Mainly, those that increase Unconditional Love, Compassion and the spiritual dimension of the Self in an atmosphere of joy, happiness and collaboration.

F.A.U. will provide the necessary spaces and elements so that, individually or collectively, they can transmit, teach, experiment, learn, practice and develop the innate artistic and spiritual capacities, enhance them or, simply, recreational spaces to attend demonstrations or events related to them.

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs

F.A.U. PROJECT

FAMILY, ASSISTANCE, UNION

6.2 PLAN OF ACTION:

1. Promote art in its different branches like painting, music, monuments, sculptures, everything done manually, as part of our expression.
2. Promote the cultures of each region to enjoy Peace, Harmony and Love, promoting Human Values.
3. To promote the development of Creativity.
4. To promote sports as part of general health.

6.3 TOOLS TO EXECUTE THE ACTION PLAN:

With these tools F.A.U. contributes to the expression of the Self through art, culture, creation and sport.

1. Build spaces to develop and exhibit Art.
2. Create programs to learn, develop and practice different cultural activities and/or events.
3. Create videos and/or audio-visual programs that help develop the imagination and motivation to create.
4. Promote art by attracting artists and providing them with the appropriate spaces and means for artistic creation, its dissemination and implementation in other geographical and social environments.
5. To create spaces to carry out sports activities.

CONCLUSION

Having exposed and examined all the Project here written, we put into action all our wishes here expressed and we remain open to expand it with new projects that cover needs not specified in it.

Therefore, it is understood that this is a Functional Project open to all those necessary actions to be carried out and organized to contribute to the creation and consolidation of the New Earth.

With all the Love and the desire that what is herein exposed contributes to the integration with Gaia, our Mother, and with all the sentient beings of her surface and her interior in a single Divine Consciousness and a multiplicity of manifestations.

F.A.U. is a living, active and conscious program in continuous movement that adapts itself to social and evolutionary movement of human consciousness. This implies the possibility of modifications in its plan of actions and tools, as well as the creation of new programs 13
